

In accordance with state law (Section 341.014 (b) TX Health and Safety Code):

CITY OF DECATUR PUBLIC NOTICE TO PRIVATE WASTE PROVIDERS

RE: VEGETATION WASTE SERVICES

The City of Decatur, TX is applying for the FYT26-27 NCTCOG Solid Waste Grant to provide **vegetation waste reduction services**, in the form of air curtain burning, to its residents. The project falls under the category of Source Reduction and Recycling. This process aligns with the 2022-2042 Regional Solid Waste Management Plan's goals of lowering landfill use and advancing material management.

If awarded, this project aims to mitigate environmental and safety risks posed by large piles of vegetation waste, including wood chips, by employing modern waste management techniques that will convert waste to potentially useful ash.

If there are any private sector providers in the area that offer this type of service and would like more information, please contact our Point of Contact below:
